SEMINAR

AI as a part of our life

Wednesday July 31st
2:40 pm - 4:10 pm
Room G302

Speaker: Marko Sahan

Natural Language Processing Engineer in CEAi company
External collaborator of the Czech Academy of Sciences
(Final year Masters Degree student in Mathematical Engineering)

Main purpose of the lecture is to show that there is no magic around Artificial Intelligence. Following lecture will explaine basic concepts of how modern Machine Learning techniques work based on real life examples. This lecture is designed for non engineering people to give an overview of how world cooperates with the huge amount of the data around us.

Anyone is welcome to attend, no registration required.
